Harvest report PWBORDERLESS

Crops picked this season are listed below without any lines.

Crop	Rows	Yield	Grade
Apples	120	0.50	A
Pears	80	0.75	B
Plums and damsons	007	1,250.00	A
Quince	12	3.10	C

Yields are in tonnes per row and were measured at the packing house.

Station	Rain mm	Days
Upper farm	412	61
Lower farm	388	58
River field	455	64

Rain was recorded each morning.

Notes

The river rose slowly through the wet spring and the lower fields stayed under water for most of April while the upper farm dried out early enough to plant beans and the first of the summer barley before the rains returned in May and kept the soil soft until harvest began in the last week of the long and warm summer

Wetlands along the bank stored the floods and let them go again over the dry months so the streams never ran empty and the cattle had water all year which the farmers counted as the best outcome of the work done on the ditches and hedges in the winter before the season when the new plan came into use
